

## Inside the Mind of a Master Procrastinator

Tim Urban encourages us to think harder about what we're really procrastinating on before we run out of time. Urban's blog, [Wait But Why](#), has garnered millions of unique page views, thousands of patrons and famous fans like Elon Musk of Tesla.

Why are millions of Americans making about half on average as compared to someone with a college degree or IT certificate? It is probably nothing but procrastination that kills career opportunities.

We usually are able to manage and get things done that have deadlines even if we procrastinate. But the real issue is about things that do not have a deadline such as exercise, start saving for retirement, working on relationships, going for colonoscopy test (if you are over 50) that may save you from colon cancer, making a will or starting a career training or college.

Watch the excellent presentation below.
